

Eco Learning [1]

School trips are probably the most efficient type of ecological education, since they allow students to interact directly with plants and animals during a few days spent in our Centre. Such trips allow children and young people to understand and remember the theoretical knowledge they have gained during school lessons, and help teachers kindle a sense of respect for nature among their students.

During such trips, also known as "Eco Learning", groups of children and young people have access to the Centre's laboratories, the Polish Fauna Garden and the Botanical Garden. They can take walks along the educational trails and access all the attractions offered by the Forest Park for Culture and Leisure.

Our state-of-the-art hotel facilities can accommodate 32 visitors (capacity of specific rooms: 2, 3, 9 and 11 people).

Apart from education, we can also offer many options for outdoor leisure. The Centre's facilities features a volleyball court, ping pong table and basketball court. In the evenings, campfires can be arranged.

NOTE!

Please book your stay with us in advance

Contact: Kasia Oleszczuk, phone no. +48 52-328-00-01

e-mail: bcee@bcee.bydgoszcz.pl [2]

NOTE!

Hotel rooms can also be made available to groups and private individuals not related to education.
